

HiFi Test TV-HIFI	Oberklasse	Note 1,1	6/2016
	Preis/Leistung sehr gut		

21-October-2016

VERY GOOD (HIGH CLASS)

A fantastic review of the TAGA Harmony set: HTR-1000CD hybrid CD-Receiver, Azure S-40 v.2 bookshelf speakers and Blue-16 speaker cable – by the “HiFi Test”, a German reputable audio magazine (10-2016).

HTR-1000CD / AZURE S-40 v.2 / BLUE-16

WELL COMBINED

Praxis

Unpacking and setting up is very simple, only the loudspeakers have to be wired; suitable speaker cables in a surprisingly good quality are already included in the package. The TAGA combo plays at a remarkably high level, thanks to small-sized Azure S-40, which deliver an amazingly homogeneous sound, resolving sound details in a scrupulous way and shine with convincing spatiality. The TAGA combo is able to perform quite dynamically with the help of a powerful CD-receiver and loudspeakers which are quite strong too – **the small combo brings real fun!**

Conclusion

If you listen to CDs as well as to radio, and sometimes use your smartphone as a music player, the Taga HTR-1000CD will serve very well. Together with small, strongly sounding Taga Azure S-40 bookshelf speakers, **this duo is a true winning team** and costs around 700 Euros in the package with a set of speaker cables - **a real price hit!**
